Summary

- I am a person who loves to find and providing solutions to problems while making software, particularly in the field of Back-end Development. Driven by self-motivation and a hunger for growth, I constantly seek opportunities to learn and expand my skill set.
- I have accumulated over 6 months of experience in developing web applications using C#, Java. Currently, I am actively engaged in expanding my skill set by acquiring knowledge in ASP.NET Core and Azure Cloud Services, with the aim of broadening the scope of my employment opportunities.

Skills

- Programming Languages: C#, Java, Javascript
- Frameworks/Libraries: ASP.NET Core, Entity Framework Core, Bootstrap
- Server-side Technology: Java Servlet
- Markup Language: HTML
- Styling Language: CSS
- Databases: Microsoft SQL Server
- Design Patterns: MVC, Object-Oriented Programming (OOP)
- Version Control: GitHub
- IDEs: Visual Studio, NetBeans
- Cloud Services: Firebase Storage, Azure Cloud Services
- Testing: Unit Testing
